Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? No

Website address:

Explain: C-M-L Telephone Cooperative is a small rural service provider that provides service in conjunction with the iWireless network. The Company does not maintain its own web site because it lacks the personnel and resources necessary to maintain an extensive site and because such resources are better used for extending service to rural and underserved areas. Information about the Company's iWireless service and a complete list of handset offerings (including a click-box feature that allows customers to easily sort and identify hearing aid compatible devices) is provided at <http://www.iwireless.com/phones.asp>. An explanation of the HAC rating system, along with links to industry resources, a list of compliant devices and their compatibility ratings, a description of the company's methodology for determining handset functionality and information on other wireless accessibility options for the deaf and hard of hearing are readily available to the public at http://www.iwireless.com/customer_support-hearing_aid.asp.

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: The Company has instructed its sales staff about the availability of hearing-aid compatible phone models and it has wireless industry pamphlets available in its company store to provide information on the FCC's requirements and HAC rating system. Additional information about hearing aid compatibility is available on the iWireless web site at http://www.iwireless.com/customer-support-hearing_aid.asp.

Methodology for Functionality Levels

Levels of handset functionality and methodology for determining functionality are as follows:

- Basic phones (entry-level devices offered for \$10 or less)
- Feature phones (devices with more advanced features and capabilities offered for more than \$10) and
- Smartphone/PDAs (devices that run complete operating system software as a platform for application developers)

Report Remarks

Carrier may offer certain handsets that are capable of operating on more than one air interface. Carrier currently operates only on the air interface(s) specified below. The Commission has made it clear that the HAC handset phase-in requirements specified in Section 20.19(c)(3) apply only "for each air interface it offers." Report and Order, 18 FCC Rcd 16753 (2003) at ¶ 53. Moreover, these handset phase-in requirements are triggered only after a service provider has begun offering service using a particular air interface. Memorandum Opinion and Order, 22 FCC Rcd 7171 (2007) at ¶ 60.
